## CT Summation and Pinpoint Labs Partner to Enable Remote Automated ESI File Collections

**SAN FRANCISCO and MURRAY, Neb. - Feb. 16, 2010** - [CT Summation](#), part of CT, a Wolters Kluwer business, and the premier provider of litigation workflow, today jointly announced a partnership with Murray, Nebraska-based [Pinpoint Labs](#), a forensics software developer and litigation support firm. The strategic partnership will streamline the process of collecting and reviewing electronically stored information (ESI).

Through this partnership, CT Summation will offer Pinpoint Labs One Click Collect to quickly and easily create defensible and verifiable electronic discovery collections. Legal professionals will be able to create collection job tickets that automatically run on custodian systems and servers. Whether clients want to collect from dozens or even hundreds of systems and servers, One Click Collect streamlines the process and creates a defensible collection which simply and reliably loads into the CT Summation family of products (iBlaze, Enterprise, CaseVault and Discovery Cracker). This pairing of One Click Collect and CT Summation technology will reduce costs and expedite litigation workflow management, from collection through production.

"We are excited about our partnership with CT Summation," said Jon Rowe, president of Pinpoint Labs. "One Click Collect provides fast, secure, automated and documented active file collection which simplifies and creates a more defensible process. This partnership provides a seamless and efficient addition to CT Summation's eDiscovery and litigation workflow solutions."

One Click Collect forensically collects active file data through computer networks or simply by attaching a USB drive to any PC running Microsoft Windows. Eliminating the need for expensive forensic collection agencies and the cost of travel-related expenses, this technology will ultimately save legal departments, law firms and their clients time and expense.

"Law firms and their clients can now extend their control of the eDiscovery workflow easily and economically. Our partnership with Pinpoint Labs provides a solution for cases large and small, whereas in the past, the cost and challenge of evidence collection could be prohibitively expensive," said Tom Rump, general manager, CT Summation. "One Click Collect paired with CT Summation's Litigation Workflow Management solutions creates real value in litigation workflow efficiencies, streamlining the whole process from collection to review and production."

### About CT Summation

CT Summation is the premier provider of litigation support and eDiscovery solutions that help legal professionals succeed from discovery to case review and analysis through production. From desktop and server applications to hosted solutions, CT Summation combines a set of award-winning technology solutions (iBlaze, WebBlaze, Enterprise, CaseVault, Discovery Cracker and CaseVantage) with market-leading expertise that provide the decisive advantage for law firms and legal departments, large or small.
